

SpaceVac Explorer
Wireless Camera & Monitoring System

Introducing the new SpaceVac Explorer...

The latest innovative addition to the SpaceVac range - has been designed to improve the user experience; further enhancing our reputation as the world's leading manufacturer of high level cleaning systems...

The SpaceVac Explorer:

Working closely with our specialist manufacturing centre, our engineering team have developed and tested a brand new system packed with new features and cutting edge camera technology.

The resultant system is the most powerful, flexible and efficient camera system available anywhere in the specialist cleaning marketplace. The brand new **EXPLORER** systems packs a range of innovative new features including:

- Newly designed **aerodynamic action camera form**
- Incredible **9 hour battery life** to allow for day-long operation with no need for charging on the go
- Full **360 degree rotating** camera lens
- **Ultra durable** construction for use in even the harshest cleaning environments
- **Fully Waterproof** construction.
- **Loop recording mode** for overwriting when internal storage reaches capacity.
- **Waterproof connection points** for external devices and power supply
- High quality **low light performance** to allow for easy monitoring in dimly lit areas or when working at night
- High quality video performance featuring **1080p full HD** video recording and **12MP stills**.
- **User friendly** operation.

A Brave New World

The Camera transmits in real time to the mobile screen (which includes Wi-Fi capability) using our new Spacevac app - pre-installed on the handset and paired ready for action.

The camera can however, also pairs with any other mobile device as well allowing the user to utilise their own phone if desired.

Testament to its engineering pedigree; the systems ability to withstand huge G forces and operate in weightless atmospheres, whilst also being designed to withstand water, dirt and bumps made it well suited to the rigours of space travel - leading to its use on the **NASA Funded 'Orbital Sciences'** space mission.

Explore New Heights...

The system is the perfect upgrade to our Spacevac high level cleaning systems; providing operators with a clear view of the work in progress along with the ability to record images or video footage for evidence of work or HD video footage for client marketing purposes.

In addition - When combined with our Spacevac telescopic inspection pole systems, the system is perfect for any inspection purposes such as:

- Pest control
- Security
- Emergency services, checking building for occupancy etc
- Building inspections
- Fire control inspections
- Crowd control and surveillance
- Tree surgery inspections

This flexibility makes the camera system an ideal investment for clients with a diverse portfolio of responsibilities - such as partners in the Facilities Management and Building Service sectors.

In addition to the many new and exciting features, the Explorer system also features a "remote access function". This game changing new functionality, allows the operator to share a live view of cleaning work in progress with their client or management - even offsite - for a swift response to any onsite issues.

Connecting users in this unique new way, provides a new level of access to users that revolutionises control and communication in the specialist cleaning and facilities managements sectors.

To enable operators to keep a close eye on cleaning progress in real time, the new Explorer camera also comes equipped with our innovative new flexible monitor support.

This new lightweight addition to the camera and monitoring system can be shaped and positioned anywhere and keeps the phone / monitor fixed firmly in the line of sight for operators without the monitor moving from being attached to the base of the cleaning pole.

Made of lightweight materials, this comfortable easy to use accessory is another innovative new addition to our camera range - designed with

functionality and user comfort in mind.

Packed full of innovative new features, the 2020 **Explorer Camera and Monitoring system** is a game changer for anyone in the cleaning, facilities management and building services sectors.

Be sure to book a free onsite demonstration with your local SpaceVac representative today to see the camera system in action for yourself - spacevacinternational.com

What's Included: SVCAM/EXPLORER-KIT

Each SpaceVac Explorer system comes with the following items included as standard:

SVCAM-EXPLORER
Waterproof Explorer
Camera

SVCAM-OBSERVER
1 x Phone Monitor

2 x SVCAM-CLAMP
2 x Camera and
Monitor Tube Clamp

SVSCREEN-MOUNT
1 x Camera Mount

SV/CB
1 x Camera Bag

2 x SV/CC
2 x Camera and
Monitor Quick
Release Clip

SV/USB
1 x USB Cable

SV/DC
1 x Data Cable

Available Accessories:

SV/IP35
35 ft Telescopic
Inspection Pole

SVCAM-FLEXIHOLDER
1 x Flexible neck
Bracket

SV/IP55
55 ft Telescopic
Inspection Pole
